Postcard front - trim to the outside rectangle

Actual size 100%. Cut size: 150 x 100 mm. Colour printing for small accents.

Postcard back - same centred position

Test duplex alignment on scrap paper; printer feed and flip settings vary.

Colour key and print checks

Print front and back at 100%, with matching paper size.

Hold the two trial pages against light to check the rectangles align.

Do not scale to fit: check the 50 mm line below with a ruler.

For separate prints, use the reverse as a writing guide instead of gluing.

Ordinary printer paper may be too thin to mail as a postcard.

Check your postal service and printer stock limits; an envelope is an option.

Digitally checked; not physically printed, painted or mailed.

50 mm at actual size
