# Try the setup before your wedding

Assemble A B / C D on a flat backing before inviting guests to paint.

Assign a panel and an unfinished numbered area; share the same colour key.

Keep the names sheet separate so names do not cover the picture.

Let paint dry flat before moving; protect the dry work for transport.

Try a spare print and a small group first. Guest capacity is not tested.

This is a digital trial pack, not a supplied paint set or tested event service.

Small details are preprinted. Use a colour printer and inspect all seams.
